How can you even think of raising our utility bill in south carolina when the federal government has stated there is now need for a COLA adjustment as the cost of living has not gone up and we the people have to face the fact that our economy is not doing well and we have to tighten our belts and do our best in the face of our economic hardships. We are trying but to be honest we are having a great deal of difficulty paying our utility bills especially with our current hardships and the rate increase we have had to endure due to the unduely cold weather this past winter. Even with our thermostats set at 67 degrees and the need to wear sweaters and thermals in the house. We are saying please reconsider a rate hike....we are at our breaking point . Please
